

Sustainability @ Loreto College

What have we done this year?

- **Clean Up Loreto** - A fabulous group of 16 students from Year 7 -12 volunteered at lunch to clean up Loreto & Lake Foreshore.
- **Pop-up clothing exchange** - Year 7 & 8 Students brought in pre-loved clothing to stock our own op-shop, reusing loved items and reducing clothing waste.

What is coming up?

- Community Environmental Projects including shrub planting with Ross Creek Landcare.
- Initiatives within the school community to reduce waste, introduce more eco-friendly options and raise student and staff awareness of environmental issues.

Clean Up Loreto - this is the rubbish collected from drains, garden beds and walkways around our school - we can do better!!

How can YOU act more sustainably?

Take Action - Join the EAC!

- The Environmental Action Committee (EAC) welcomes any environmentally conscious student who wants to help make Loreto and the world better.
- We meet in SG306 on Thursday Lunch, Week B
- Come along with friends and be involved!

Waste disposal

- Put paper into paper recycling bins in classrooms or next to printers
- Put rubbish into bins - don't leave on the floor or ground.
- Use containers instead of bringing food in small, plastic wrappers.

Use resources wisely

- Don't crank up heaters in classroom - the best temperature for learning is 22 degrees Celsius!
- Print on both sides of the paper
- Don't leave the water tap running longer than you need.
- Avoid bottled water - reusable drink bottle is best!
